Q. I want to drop a class. How do I do that?

- Go to my.wsu.edu and sign in. You can make changes from the Student Center by clicking on Enroll or by using the drop down option. Choose ‘Enrollment Drop’.

- Dropping a course will take three steps. The first is to select the course that you want to drop by clicking on the box to the left of the course. Once you choose “Drop Selected Classes”, you’ll be taken to the next step.
At the Confirm you Selection page, you’ll be able to make sure that you are dropping the course that you want to drop.

The final page lets you review the results – you should get a “Success” message when your drop is processed. Note that you can return to “My Class Schedule” once your drop is completed, or you can choose any of the other tabs at the top of the page to navigate to where you want to go.
